Bachelor of Science in Business

Major in Accountancy

WORK EXPERIENCE

Slalom Consulting, LLC

Consultant

January 2021 – Current

- Utilized dbt to create modular SQL stored procedures to deliver stable data marts.
- Designed and published scalable Power BI dashboards analyzing and comparing predictive model performance across several sectors for a global energy company.
- Created senior housing portfolio Power BI dashboard connected to an analysis services cube, a first for the asset management department of a REIT. Provided asset performance and metric tracking to senior leadership. Managed end-to-end deployment processes, ensuring seamless production integration
- Developed a suite of Tableau dashboards facilitating deeper insights into asset performance and providing comprehensive analysis within a mid-size REIT.
- Spearheaded the development and implementation of a comprehensive set of dashboards for the Investor Relations team, leveraging in-depth requirements gathering to ensure alignment with stakeholders needs and objectives.
- Advised database administrators on design and functionality of a new enterprise data warehouse, ensuring accurate and effective data modeling.

PricewaterhouseCoopers, LLP

PCS Tax Digital Accelerator

January 2018 – January 2021

- Lead developer of analytic app suite automating tax review process, creating the only workflow collection required to be used by the entire tax practice.
- Deployed complex Alteryx solutions, saving 2,000+ hours/month and enhancing tax process efficiency across the practice.
- Created and executed practice-wide training on multiple proprietary software systems and third-party programs, including Alteryx, Tableau, SQL, and UiPath.

United States Navy

Cryptologic Technician-Maintenance (CTM)
